A Correction on

Diversity of transgene integration and gene-editing events in wheat
(*Triticum aestivum* L.) transgenic plants generated using *Agrobacterium*-
mediated transformation

by LC, Bykova NV, Robinson J, Brown S, Ward K and Bilichak A (2023). *Front. Genome Ed.* 5:
1265103. doi: 10.3389/fgeed.2023.1265103

In the published article, an error was identified in the Methods section regarding the species name of *Agrobacterium* used for wheat transformation. The organism was incorrectly listed as *Arabidopsis tumefaciens*.

A correction has been made to section 2 Materials and methods, 2.2 *Agrobacterium*-mediated wheat transformation, Paragraph Number 1. The correct statement is as follows: "The transformation was performed using the hypervirulent *Agrobacterium tumefaciens* strain AGL1 carrying the pSoup helper plasmid and the JD633 plasmid containing the cloned gRNA seed sequences."

The original article has been updated.
