The Editor-in-Chief would like to alert the readers that concerns have been raised about Fig. 4, SNF 0.1 mg/kg and Fig. 4, Tramadol 50 mg/kg, as they appear to be highly similar.

The authors have stated that the duplication occurred accidentally while preparing the figure. However, upon request they were not able to provide the original raw images.

Readers are therefore advised to interpret these results with caution.

Irene Díaz-Reval disagrees with this Editorial Expression of Concern.
