Editor
L. LŐKÖS

Assistant Editor
CS. LOCSMÁNDI

Hungarian Natural History Museum
Budapest, 1994

The front cover picture is a line drawing of *Iris hungarica* W. et K. 1807 published in *Descriptiones et icones plantarum rariorum Hungariae* (Vol. III, p. 226, 1812). Today it is considered as a subspecies of *Iris aphylla* L. It is a characteristic member of forest-steppe in NE-Hungary (Zemplén Mts, Szendrőlád, Nyírség). It also occurs in Romania, Slovakia and the Ukraine.

Editorial announcement

Recent developments in desktop publishing offered an opportunity to renew the appearance of our Studia botanica hungarica. We intend to publish papers of foreign contributors, preferably focusing on Hungarian subjects, especially regarding the plant material of our Museum. For details on technical instructions of preparing manuscripts please see the pages at the end of this volume.
