UPCOMING RELEASE

JENNIFER ACKERFIELD. 2015. **Flora of Colorado. 2nd printing (2018) corrections.** Sida, Botanical Miscellany 41. (ISSN: 0883-1475; ISBN-13: 978-1-889878-45-4, flexbind). Botanical Research Institute of Texas Press, 1700 University Dr., Fort Worth, Texas 76107, U.S.A. (**Orders:** www.shopbrit.org, orders@brit.org, 1-817-332-4441). $65.00, 818 pp., color photographs, maps, references, index, 6.5" × 9.5".

From the Publisher: Colorado has a rich diversity of ecosystems and vegetation communities, ranging from 3,500 ft to over 14,000 ft in elevation, and ultimately supports over 3,300 vascular plant species. This book is a comprehensive guide to the vascular plants in Colorado and contains descriptions, distribution maps, habitat information, flowering times, and elevation ranges for all species. Color photographs for nearly 1/3 of the species are also included. The aim of this guide is to enable students, researchers, amateur and professional botanists, or anyone interested in the flora of Colorado to successfully identify plants with confidence and satisfaction.

Originally printed in 2015, *Flora of Colorado* is being reprinted with corrections. Corrections include the following: over 50 map corrections, miscellaneous typo corrections, several changes to family keys, the splitting up of longer family keys into subsets, correction of an erroneous photo, addition of more color *Carex* photos, changes to the *Cirsium* key, corrections to the biographical sketch of H.D. Harrington, and addition of missing index entries. A complete errata listing is included in the second printing and will also be available for free online for those who would like to correct their first printing copies.

Major revisions including significant changes to family, genera, and species will be incorporated into a second edition with an anticipated release date in 2020.

This document is intended for digital-device reading only.
