

Orchid Research Newsletter No. 48 (July 2006)

Introduction

With the retirement of Dr. Phillip Cribb, who conceived and established the *Orchid Research Newsletter*, Dr. Dave Roberts and I will continue his legacy, that is, if you the reader want us to do so (see below). Phil founded the *ORN* in 1983, first published solely as hard-copy and mailed out to well over 100 orchid scientists around the world to keep them abreast of new names, new books, new references, upcoming conferences, and each other's research. Phillip's late, older brother Steve, who was confined to a wheelchair because of polio, often designed humorous covers for the *ORN* electronically with only a few fingers. Steve's determination to live his life in the most fulfilling way possible, including his campaign to install facilities for the handicapped on British transport, was an inspiration to all and especially to Phil.

Phil, too, is an inspiration to three generations of orchid scientists. He was the Deputy Keeper of the Herbarium, leader of Kew's Orchid Team, and took an active role in redefining our concepts of orchid taxa at all ranks. At the same time he produced 400 publications, many of them these floras or monographs or historical works that will outlast most of us, perhaps all of us. He chaired the Orchid Specialist Group of the SSC (IUCN) from 1997 though 2005. His medals would light up a Christmas tree -- Westonbirt Medal from the Royal Horticultural Society, Gold Medal of Achievement from the American Orchid Society, Gold Medal from the Orchid Society of South-East Asia, Meritorious Service Medal from the Orchid Digest Foundation, and just this month the prestigious Veitch Memorial Medal from the Royal Horticultural Society.

His research continues apace, and in fact he now enjoys being able to devote more time to it. A second edition of his monograph of *Cymbidium* is due out soon. Other projects nearing completion are *Tropical American Slipper Orchids*, *The Orchid Paintings of Friedrich Lehmann*, and *Orchids of Tonga, Niue & the Cook Islands*. And, of course, he continues as co-editor and contributor in the *Genera Orchidacearum* series.

On behalf of all who have known Phil, studied with him, read his books, or benefited in so many ways from his work through the Royal Botanic Gardens, Kew, Dave Roberts and I would like to thank him here for devoting his life to orchids and orchid scientists, not to mention devoting 32 years to RBG Kew. We find solace in knowing that he's still active here at RBG Kew and available to solve our problems!

Alec Pridgeon

Future of ORN

With new orchid names now available on the IPNI website (see below), the need for a separate *Orchid Research Newsletter*, which is now entirely electronic, is being reconsidered. If you find the content of the ORN such as new references worthwhile and you consult it at least once a year, please send an e-mail to Alec Pridgeon (a.pridgeon@kew.org) to that effect. Our web team will also be monitoring "hits" to this site to gauge its popularity. If enough response is generated, we will continue to post issues here semi-annually. If not, this must be the last issue, ending 24 years of continuous publication.

Upcoming Conferences

Next year holds in store at least three conferences of note, so begin planning now. First up, the Third International Orchid Conservation Congress in conjunction with the Second International Conference on Neotropical Orchidology will be held in San José, Costa Rica, on 19-24 March 2007. It will be preceded by the Costa Rican National Orchid Show, 15-18 March. Carlos Ossenbach, Wilella Stimmell, Jorge Warner, and Franco Pupulin will, as always, provide a superb program and gala dinner with fabulous tours to Jardín Botánico Lankester and Tapantí National Park. More information is available at www.jardinbotanicolankester.org/ing/congress.html.

On 31 October and 1 November 2007, an orchid conference with leading systematists from around the world will be held at the Royal Botanic Gardens, Kew, in association with the year-long celebration of the Linnean Tercentenary. Details will soon be posted on the RBG Kew website (www.rbgkew.org.uk) and also the Linnean Society of London website (www.linnean.org).

Finally, on the heels of a most successful First Scientific Conference in Gualaquiza, Ecuador, the Second Scientific Conference on Andean Orchids will convene in Loja, Ecuador, at the Universidad Técnica Particular de Loja (UTPL) on 15-17 November 2007. The university has a state-of-the-art convention center that can seat 800, with three huge video screens and a professional sound system. Part of the hall will be sectioned off with a modular wall for a poster session, too. Preceding the conference, an international orchid show promises 1000 species in flower! Pre-conference and post-conference tours throughout mainland Ecuador with Ecuagenera are also planned. Further information will be placed online at both www.utpl.edu.ec and www.ecuagenera.com. For the time being, reserve all these dates on your calendar.

Recent Orchid Nomenclature

New orchid names added since 30 November 2005 may now be accessed on the IPNI website (www.ipni.org/ipni/plantsearch?request_type=search&output_format=query&ret_defaults=on). Click on "Show additional search items" on the right-hand side of the screen (Figure 1). After the search page appears (Figure 2), type in **Orchidaceae** under family name and (for example) **2005-11-30** under "Record date" and "Added since." This will pull up a list of all names added to the IPNI database since 30 November 2005.

Recent Literature

We are grateful to Ann McNeil, compiler of the Kew Record of Taxonomic Literature, and to Anna Lynch and Margaret Ramsay for drawing our attention to the following publications from 1 January to 1 June 2006.
