boreali, Illinois, frequens super saepimenta lignea putrida (Dr. John Eckfeldt; communicavit Lojka). Affine *Thelocarpo Laureri*, sed majus, paraphysibus frequentioribus. Conferte crescens.

12. Dominus G. Bonnier, qui, ut pro certo affirmavit, synthesi prodigiosa ex elementis „fungi" et musci creavit Lichenem, historiam creationis illius adhuc reticet. Dolemus moram semperque avide exspectamus singula rei mirificae ediscere. Vel anne gloriosus creator musco-lichenicus numquam revelabit, quomodo e musco fit Lichen?

13. Corrigenda. In Addendis prioribus, Flora 1885, p. 45, lin. 36, pro „typo", lege: typum. Ibidem p. 47 addere conveniret quoad fig. e Winter Ueber die Gatt. *Sphaeromphale* citatam spermotiorum, nulla talia spermatia apud ullum Lichenem obvenire. — In Add. XL, Flora 1883, p. 100: „*Lecidea*" *circinatula*, lege *Lecanora*; p. 103, lin. 4: „*papulosae*", lege *papulari*. — In Add. XLI, Flora 1883, p. 535, lin. 6: „gonidia", lege: soredia.

Parisiis, die 15 martii, 1885.

Neue Orchideen-Species.

Von **H. G. Reichenbach f.**

Saccolabium coeleste n. sp.

racemo densifloro breviusculo, sepalis tepalisque oblongis obtuse acutis, labelli auriculis angustissimis sub columna, lamina unguiculata antice rhombeo obsusangula, calcari compresso curvulo, aristis geminis in calcari inclusis ab apice inferiori antrorsis. Flos albus. Labellum ac apices sepalorum ac tepalorum intense coerulei. Ex Cochin-China?

Cyrtopodium Saintlegerianum n. sp.

omnia *Cyrtopodii punctati* Lindl., bracteis parvulis bene undulatis, ovaria pedicellata non aequantibus, labello transverso laciniis lateralibus ellipticis transversis, lacinia antica obtusangula retusa, calloso marginata, callo disci ligulato obscure lobulato, non muriculato, sepalis tepalisque valde obtusis. Paraguay. St. Léger.
