KEYWORDS

arid and semi-arid regions, drought stress, genetic stability, marginal environments, multi-traits genotype-ideotype distance index, salinity stress, stress tolerance index, water scarcity

A Correction on

Differential response of finger millet accessions to contrasting saline-water levels and irrigation regimes under desert conditions

By Talabi A, Nhamo N, Thushar S, Vikram P, Rahman H, Shahid M, Sood N, Sudheer M, Thikkamaneni D, Almarri A, Alsaffar F, Galani D, Alam M, Goel S and Singh RK (2026). *Front. Plant Sci.* 17:1754820. doi: 10.3389/fpls.2026.1754820

Affiliation 4 “Department of Biotechnology, Birla Institute of Technology & Science Pilani, Dubai, United Arab Emirates” was erroneously given as “Birla Institute of Technology and Science, Dubai, United Arab Emirates”.

The original version of this article has been updated.

There was a mistake in [Table 5](#) as published. Unit of Grain Yield and Dry Fodder Yield were quoted in kg/ha. Similarly, the SI units of water salinity were quoted as ds/m. The corrected [Table 5](#) appears below.

The original version of this article has been updated.
